Alabama's Aviation Impact

Overall, Alabama's 78 airports serve as an economic catalyst benefiting all 67 counties through economic development, tourism, emergency services, and overall enhanced quality of life. **Every dollar spent at an Alabama airport yields five dollars in return.**

Call to Action

The Aviation Council of Alabama (ACA) is calling our legislators to action to support the aviation and aerospace industry through much needed investment back into our airport system. **A minimum investment of \$25 million dollars this fiscal year, & continuing annually, will provide ALDOT Aeronautics with the resources needed to maintain and grow the airport infrastructure in our state that connects Alabamians to markets around the world.** Alabama's airport system is growing at a rapid pace as enplanements, aircraft operations, and industry investments continue to rise across our airports. Historically, ALDOT Aeronautics, with the limited resources available, has made investments at every level of airport across our state. However, at the current funding level, ALDOT Aeronautics does not have the resources to properly maintain nor grow our airports. Invest in Alabama's airports!
